EXPERIENCE

DEVELOPMENT BANK OF SINGAPORE   *Hyderabad, IN*
React Js Developer (REBACS)   *April 2021 – Present*
- Worked on the Rebacs app UI using ReactJs, Redux, Typescript. Implemented redux-persist to persist the redux state after refresh of the page. Implemented access management from UI.

QWINIX   *Mysore, IN*
Full stack Developer (Cooler Screens)   *November 2020 – March 2021*

- Worked with Gen2 initiation - CX Enhancement by integrating Verizon ads to Cooler Screens. Worked on batch reporting the report to Azure IOT hub from application backend.
- Helped the team in adding the blur transition for better customer experience in cooler screens video flip.

UNION BANK OF SWITZERLAND   *Pune, IN*
ReactJs, Redux - Front End Web Developer (ISE)   *February 2019 – November 2020*

- Developed end to end Questionnaire functionality with View, Edit, Review, Create modes which helped the team in reducing the hassle of gathering data from clients.
- Created reusable code components using React that reduced the development time by 20%.
- Technologies included in the application development are ReactJs, Redux, React Router, Javascript, Material-UI, React Bootstrap, SCSS, HTML, CSS.
- Created the release pipeline to deploy the app to higher environments using Maven, Github, Teamcity and internal deployment tools.
- Improved the performance of the existing application by using the latest React(hooks) and converted class-based components to functional components
- Implemented the UI by collaborating with designers and software developers and integrated the backend REST API with Frontend UI.

WIPRO DIGITAL   *Hyderabad, IN*
Project Engineer (Application Adoption Factory)   *June 2017 – February 2019*

- Languages that I had worked on in this project were Javascript, Java, Maven. I was a developer in this project, working on migrating Websphere, Tomcat and Batch processing Enterprise applications from legacy to IAAS infrastructure by going through a complete SDLC life cycle.
- Improved the legacy code and enabled apps for continuous development, continuous integration and continuous deployment using Maven and Jenkins.
- Working with the onsite and offshore teams to remediate the apps,analysing test cases by coordinating with Functional testing and Non-Functional testing teams
